

PERFORMANCE GOALS – PRIORITIES

Overview

This document is a quick reference guide to the performance goals of the myPG Sustainability Plan. The following steps were used to develop this guide:

- Establish a generic framework of performance goals;
- Ask the community what their vision of Prince George’s future is;
- Use the generic framework to categorize community input;
- Refine the framework to reflect community input – how people actually think about the goals – and to have discrete performance goals at the same level of aggregation;
- Refine how the input was categorized to match the refined framework;
- Establish preliminary community priorities by counting the number of responses in each category;
- Compare community priorities with those in the City’s Corporate Strategic Plan, and with the key risks identified in the Scenarios workshop.

Performance Goals and Priorities
